PREFACE

This publication presents information relating to milk supply areas for handlers regulated under Federal milk marketing orders, which are authorized by the Agricultural Marketing Agreement Act of 1937.

In contrast to the marketing areas where the regulated handlers distribute milk to the public, and which are specifically defined by the Federal orders, the milk production areas are not specified by the orders.

This publication presents a breakdown of producer deliveries of milk to Federal order markets according to the State and counties from which these deliveries originated. It is hoped that such a breakdown of deliveries will provide a meaningful picture of the milk supply area of Federal order markets.

Table 1 shows the annual volume of milk delivered to Federal order plants by State of origin, and the percentage that such deliveries are of fluid grade milk and all milk sold to plants and dealers within each State.

Table 2 lists the Federal milk marketing areas in alphabetical order and shows the annual volume of milk delivered to each market from each State and the percentage that each State represents of the total volume of milk delivered to each market.

Table 3 shows for regional groups of markets the annual volume of milk delivered to each region from each State and the percentage that each State represents of the total volume of milk delivered to the markets in each region.

Table 4 lists the States by geographic location and shows for each county in the State the volume of milk delivered to Federal order areas, as well as the total for each market, for the month of December. While the geographic order of the States makes it possible to show the data for most markets on the same or consecutive pages, the data for some markets are several pages apart.

The two maps show milk marketing areas under Federal orders and the sources of milk for these marketing areas, by county of origin, for various volume ranges.

* * * * *

Similar data for 1957, 1960, 1963, 1965, 1967, 1969, 1972, 1973, and 1974 were issued in the following publications, respectively; AMS-243 (1958), an unnumbered Agricultural Stabilization and Conservation Service (ASCS) publication (1961), AMS-243 (1964), C&MS-50 (1966), C&MS-50 (1968), C&MS-50 (1969), an unnumbered Agricultural Marketing Service (AMS) publication (1974), AMS-565 (1975), and AMS-565 (1976).

Issued March 1978

HISTORICAL SUMMARY

A number of publications have been issued which reported on various aspects of the milk supply areas of Federal milk order markets. The following tables summarize this information for selected years, 1957-76. These data are one measure of the increasing importance of the Federal milk order program to the dairy industry, particularly the fluid milk sector, and illustrate the growth of the milk order program.

Year	Number of markets	: Number of producers in Federal milk marketing areas 1/	: Deliveries to Federal orders	: All milk sold to plants and dealers in the U.S. 2/			
				: Total	: All milk	: Fluid grade	
						: Percent	
							: fluid Grade

	<u>Number</u>	<u>Number</u>	<u>Mil. lb.</u>	<u>Percent</u>	<u>Mil. lb.</u>	<u>Percent</u>
1957	68	182,551	33,455	34	53	98,284
1960	80	189,816	44,812	43	64	103,927

1975	144,467	48	7
1976	149,493	48	2

1/ Average for year.

2/ "Milk Production, Disposition, and Income," SRS.

3/ End of year; 1957, 1960-69, 1971-76, according to 1950, 1960, and 1970 U.S. census, respectively.

4/ Prior to 1972, yearly deliveries by a State are based on the relationship of deliveries in 1 month.

During 1976, handlers subject to 50 Federal milk marketing orders received 74.6 billion pounds of milk from producers, 65 percent of all milk marketed in the U.S. and 80 percent of the milk of bottling quality sold to plants and dealers in the U.S. In comparison, Federal order milk deliveries in 68 markets during 1957 amounted to 33.5 billion pounds, 34 percent of all milk marketed in the U.S. and slightly more than half of all fluid grade marketings. The growth of the Federal order program has resulted mainly from the expansion of existing orders into new previously unregulated areas and the addition of new orders. Also contributing to the growth in recent years has been the increasing conversion of milk of manufacturing grade to fluid (Grade A) and this production becoming associated with Federal orders.

The expansion of the Federal order program has been accompanied by an expansion in the supply area. In 1957, Federal order markets received milk from 44 States. By 1976, Federal order markets were receiving milk from producers in 2,266 counties in the 48 contiguous States. A corollary trend to the expansion in the supply area of all Federal order markets is a general extension in the supply areas of individual markets. In 1957, 94 percent of Federal order markets received milk from fewer than five States—usually the State or States in which the market was located plus neighboring States. By 1976, the percentage of markets receiving milk from five or more States increased to 45 percent with 6 percent of the markets receiving milk from eight or more States.

A closer look at total marketings to Federal orders by producers in the leading milk producing States provides further insight into the changing milk supply patterns for Federal order markets. These States are ranked in two ways: Rank I, according to deliveries to Federal orders; and Rank II, according to total milk marketed in the U.S.

The following table shows the leading States delivering to Federal orders; deliveries to Federal orders as a percentage of total deliveries to Federal orders; and the relationship to total U.S. marketings in 1960, 1968, and 1976.

State	1976			1968			1960

Generally, the States with the largest milk production are also the States that delivered the most milk to Federal order markets. An exception is California where there are no Federal milk orders. Over the period 1960-76, the order of the top 10 States delivering milk to Federal orders has changed. Notably, Minnesota has jumped from 17th to 5th. Two States that were in the top 10 in 1960, Vermont and Maryland, are no longer in this group.

HIGHLIGHTS

Some highlights of the 1976 survey of sources of milk in Federal order markets were:

- (1) Producers in 29 States marketed under Federal milk orders more than 75 percent of all milk sold to plants and dealers in those States. There were thirty-four States whose producers delivered more than 90 percent of their fluid grade marketings to Federal order plants. See table 1.
- (2) West South Central producers marketed under Federal milk orders the highest percentage (92 percent) of all the milk sold to plants and dealers in that region. Producers in the West North Central and West South Central regions delivered the highest percentage (97 percent) of their fluid grade milk marketings to Federal order plants. As might be expected, producers in the Pacific region delivered the lowest percentages of their fluid grade and all milk marketings (22 percent) to Federal order plants. (This is due to the absence of any Federal milk orders in California, the second largest milk producing State in the country in 1976.) See table 1.
- (3) Seven Federal order markets received all of their producer milk and twenty-four other markets received more than 90 percent of their producer milk from the State or States in which their marketing areas are located. By way of contrast, the Southern Illinois and Indiana markets received only 38 and 57 percent, respectively, of their producer milk from the State in which their marketing areas are situated. See table 2.
- (4) In one market, Federal order handlers received all of their producer milk from dairy farmers in one State. Eight other markets had two States as their sources of producer milk. In comparison, the Eastern Colorado, Ohio Valley, and Texas markets obtained their milk supplies from producers located in eight States. Eight other markets were supplied milk by dairy farmers from seven States. See table 2.
- (5) Iowa producers delivered milk to 14 Federal order markets. Producers in Missouri and Minnesota supplied 13 and 11 Federal order markets, respectively, and Illinois and Wisconsin producers shipped milk to 10 markets.
- (6) In December 1976, producers in 2,266 of the 3,108 counties in the 48 contiguous States delivered milk to Federal order markets. Eight counties had producers delivering more than 35 million pounds of milk to Federal order markets. Ranked according to size, these counties were: Lancaster County, Pa., 86.0 million pounds; Maricopa County, Ariz., 61.1 million pounds; Dane County, Wis., 53.8 million pounds; Dodge County, Wis., 46.5 million pounds; Hopkins County, Tex., 41.7 million pounds; Stearns County, Minn., 41.5 million pounds; Whatcom County, Wash., 40.3 million pounds; and Fond Du Lac County, Wis., 38.7 million pounds.

There were 15 other counties whose dairy farmers shipped more than 30 million pounds to Federal order markets. See table 4.

- (7) There were 94 counties which each delivered more than 15 million pounds of milk to Federal order markets in December 1976. Although these 94 counties represent only 4.1 percent of the 2,266 counties delivering to Federal order markets, they accounted for 2.3 billion pounds of milk or 36.9 percent of the total deliveries to Federal order markets in December 1976. See table 4.

1/ Revised data for 1975. Partially revised for 1976.

2/ Total deliveries of milk by producers in each State to handlers regulated under Federal milk orders. Deliveries by State are based on actual deliveries in each month of that year.

3/ Computed from data contained in "Milk Production, Disposition, and Income," 1974-76 and "Wisconsin Agricultural Statistics" 1977 issue #200-77. Note: The Federal order plants to which milk from a particular state is delivered are not necessarily located in that state.

4/ Percentage Federal order deliveries are of milk sold to plants and dealers that is eligible for fluid use ("Grade A" in most States).

5/ Not published to avoid disclosing operations for manufacturing grade milk.

Kan	:	343,970	:	100.00	:
Neb	:	322,106	:	93.64	:
Okla	:	15,150	:	4.41	:
	:	6,714	:	1.95	:

1/ Total deliveries of milk by producers in each State to handlers regulated under Federal milk orders.

2/ For some markets, deliveries by some States have been combined. The States are listed by decreasing proportions of deliveries to the markets. States in parenthesis delivered less than three million pounds to the market.

3/ The data for the Central Arkansas and Fort Smith markets have been combined in order to mask restricted data.

4/ Effective April 1, 1976, The Northern Louisiana market was expanded and renamed Greater Louisiana. Prior to this expansion the data represent Northern Louisiana.

5/ Effective April 1, 1976, The Boston Regional and Connecticut markets were merged to form New England. Prior to this merger the data represent the summation of the two merged areas.

6/ Effective April 1, 1976, the New Orleans market was expanded and renamed New Orleans-Mississippi. Prior to this expansion the data represent New Orleans.

7/ Effective October 1, 1976, the Appalachian, Knoxville, and Chattanooga markets were merged and expanded to form Tennessee Valley. Prior to this change the data represent the summation of the three merged orders.

8/ Effective June 1, 1976, the Duluth-Superior, Minneapolis-St. Paul, Minnesota-North Dakota, and Southeastern Minnesota-Northern Iowa markets were merged and expanded to form Upper Midwest. Prior to this change the data represent the summation of the four merged orders.

1/ Total deliveries of milk by producers in each State to handlers regulated under Federal milk orders, grouped into regions.

2/ States whose producers marketed milk under the Federal orders located in the region. Regional totals include receipts in new markets established during the period in addition to changes in the individual markets due to expansion, contraction, merger or termination.

3/ Includes data for New York. The data were combined in order to mask restricted data.

4/ Includes data for Kentucky. The data were combined in order to mask restricted data.

5/ Includes data for Indiana. The data were combined in order to mask restricted data.

6/ Includes data for Wyoming. The data were combined in order to mask restricted data.

7/ Includes data for Texas. The data were combined in order to mask restricted data.

8/ Includes data for Nevada. The data were combined in order to mask restricted data.

9/ Includes data for California. The data were combined in order to mask restricted data.

10/ Includes data for Oregon. The data were combined in order to mask restricted data.

* Represents the production of fewer than three producers and/or restricted data. Data are included in "Unspecified."
 1/ Includes data for the restricted county of Itasca and another Minnesota county with less than ten producers delivering milk to handlers regulated under all Federal orders.

Table 4.--Sources of milk for Federal milk order marketing areas: Producer deliveries, by State and county, Dec. 1976
